

A. Information Catalyst Theory

B. Turbulance Execution Output

```
Creating Points...
✓ Point 1: "depression diagnosis"
certainty: 0.80
✓ Point 2: "anxiety comorbidity"
certainty: 0.65
Combining Points (AND operation)...
Result: certainty = min(0.80, 0.65) = 0.65
Combining Points (OR operation)...
Result: certainty = max(0.80, 0.65) = 0.80
Dependency tracking...
Point "treatment_decision" depends on:
- "depression diagnosis" (0.80)
- "anxiety comorbidity" (0.65)
Propagated certainty: 0.67
```
